

A Race Against Breast Cancer

Teletech sponsored a great course

The Foundation "A Race Against Breast Cancer" held their third "Bald is beautiful catwalk" on May 4, 2014 at Axel Borg in Copenhagen. The initiative was started by the sisters Josephine and Josina Bergsøe. Prominent guests and entertainers supported the event.

Sixteen women with the disease walked the catwalk in a fashion show wearing Danish designers' clothes which brought almost 300,000 kroner for breast cancer research.

Teletech was the total supplier for the job and was involved early on. Our technicians built the stage with

cat-walk for fashion show, installed PA systems for speech and band, led lights along the hall's walls, follow spots, and they operated the camera production. In addition, we delivered info screens placed strategically around the venue.

Our technicians also controlled sending the sound from the main hall to the basement and to the first floor.

You can see pictures and read some more about the event on the link below.
