

IAPCO EDGE

New concept for the annual IAPCO seminar

Teletech has had a great collaboration with IAPCO (International Association of Professional Congress Organizers) since the late 80s, when we delivered equipment and technical assistance for IAPCOs training seminars.

Until last year, Wolfsberg in Switzerland has been the base for the annual seminar, but from 2016 new opportunities opened up and the organizers are now taking the seminar around the world, three times a year.

The new concept, IAPCO EDGE, will offer educational training opportunities at different levels, in order to

provide congress organizers the “edge” they need in the global competition.

In 2016, Copenhagen was the host for IAPCO EDGE and per tradition Teletech delivered technical equipment such as monitors, projectors, our new wireless panel microphones from Bosch, cameras and camera production.

We also supplied the IVS voting equipment. The meeting was operated by our technicians, who have worked for IAPCO seminar in Wolfsberg for many years.
