

Medical meeting at Scandic

Apart from the technical equipment Teletech supplied the stage construction

Teletech has an extended experience with stage set up. We deliver mostly for medium-sized or smaller meetings, but we can also construct scenes after specific measurements and desires.

At the Scandic meeting, we build a stage with skirt and carpet. The graphic content for the backdrop was

provided by another company and projected with our projectors.

The lectern with screen was also provided by Teletech.

In addition, we also supplied the interpretation equipment, sound system and microphones.
