

## UCI Conference in Copenhagen

Job with stage, projector, special microphone and camera production

Copenhagen was the center of the sports' world for one week when it hosted the UCI Road Race World Championship - road VM on 19 - 25 September 2011.

One of the cycling stars who competed in Copenhagen was the Belgian cyclist, Philippe Gilbert, whom along with the director of Tour de France, Christian Prudhomme, also visited UCI Junior Conference which took place on September 22nd at Hotel Marriott.

The job was exciting because it required several

different solutions from us. We have built a scene set-up according to UCI wishes (see top picture). We have set up multiple projectors with edge blending so that it was possible to project large images with different effects. In addition, we delivered camera production consisting of three remote controlled dome cameras. We also supplied several types of microphones for the event. Here we can mention a "migrant" microphone placed in a foam rubber ball that was thrown around to the participants who had questions.
