

WorldPharma 2010

Teletech was supplier of conference equipment and network café in Bella Center

The medical congress World Pharma (The 16th World Congress of Basic and Clinical Pharmacology) was held in 2010 at Bella Center.

The congress was large and included approximately 2000 posters, 26 plenary sessions and about 40 workshops.

Teletech was commissioned to supply the equipment, technical assistance and technical project management.

The equipment consisted of screens and projectors,

preview screens for the panel, remote controlled HD cameras, Bosch delegate microphones, wireless microphones for the speakers and questions from the audience, time management and light.

We also supplied a traditional slide-desk with five laptops and printer. In addition, we delivered 20 notebook PCs, as well as internet

server for network café in the foyer in front of the A3 meeting room, where the participants could freely use a PC with Internet access.
